

HD TV is coming to Europe

Offering HD content to your guest with Philips Ultimate HD Hotel TV

A full HD guest experience bringing high definition content to hotel guests without the need for a set top box in the room. This is now possible thanks to Acentic and Philips' Ultimate HD solution. The breath taking picture quality of HD is being adopted by

major broadcast channels as well as the movie industry. Hoteliers have the opportunity to offer a unique in-room guest experience.

Acentic and Philips seamlessly integrated technology brings H264 HD content and leading VTrack and VSecure studio approved content protection via Acentic's Panorama platform.
